Employment Opportunities

We need **Motivated, Competent Individuals** for the following position:

Manufacturing Engineer/Estimator

KVI, a leading manufacturer in the Aerospace and Medical Device industries provides Ultra Precision CNC Machining, Tooling and EDM services to the world. We are seeking a highly experienced, quality driven, productive person to fulfill the Manufacturing Engineering/Estimating position.

Job responsibilities include:

- Reviewing parts to be quoted to determine production process as well as tooling and gauging requirements

- Develop detailed manufacturing methods, entering them into job management system

- Develop quality control plans

- Order cutting tooling as required

- Work with production control on setting production schedule

- CAD /CAM skills, fixture design and programming experience are very important

Join our team and enjoy working as part of a close-knit group focusing on a high level of customer service in a solid company with a great future. We are a quality driven, productive organization where you can advance your skills and experience. Come work in a place where your opinion is heard and valued. We offer an excellent work environment in a clean, high-tech facility. Perhaps you've spent many years on the shop floor and are ready to step up into another position.

Job Requirements:

Experience working in CNC shop environment for multi-axis milling, turning, and Swiss. Experience with complex parts requiring multi-axis operations. Must be a multi-tasking self starter who knows what 'Quality' means. Very competitive compensation for highly qualified applicants.

- CNC Programming Experience

- CNC Machining Experience

- Tooling Design Preferred

- EDM (Wire and RAM) Experience Preferred

- Estimating Experience for complex multi axis parts

- Proven ability to make clear, accurate decisions

- Strong verbal and written communications
